FOUR NEW KINYON VARIETIES

THE BEAUTIFUL 1935 GLADIOLUS

ROSE STANDISH

Description: One of the loveliest shades of clear light rose-pink blending lighter in throat with tiny violet markings on lower petals. Five or six wide open beautifully ruffled blooms of good size well placed on straight slender spike of 18 or more buds. The buds of this variety are very beautiful with their delicately ruffled edges and from the first bud to the last it is outstanding and different.

Parentage: A light pink ruffled seedling X Dr. Moody.

History: Bloomed first in 1929 and was exhibited as a seedling at Michigan Gladiolus Society show Battle Creek 1932 where it was a winner. (Did not bloom at right time to be exhibited in 1933). Summer of 1934 we registered it as Rose Standish and in the Rose-pink class at M. G. S. show Detroit Aug. 17-18, it was again a winner. A few days later it was again shown in the non-competitive display of the Michigan Bulb Growers, Horticulture Building, Century of Progress, Chicago.

Different growers spoke to us about buying the stock and it was purchased by the following men, ½ to each one.

Elmer E. Gove
Clamplain View Gardens
Burlington, Vermont

George T. Wentworth
1100 W. Territorial Road
Battle Creek, Mich.

Write to either of them for prices.

Best of all there is enough stock so it is being offered at a popular price.

NEW FOR 1935

Three others new and shown for the first time at Michigan Gladiolus Society show Detroit 1934 were also winners (No. 408 now Nancy Ann). (No. 458 now So Big), and Joan Pety named just before the show and entered in the pink class.

We are receiving so many inquiries in regard to these, so although the stock of each is small, we have decided to list them this year.

JOAN PETY (Exhibition)

(75 to 80 days)

Pure pink with small markings of violet on cream in lower petals. Six to ten or more blooms always perfectly placed on tall and very straight spike. A seedling of Stately Lavender and if you can vision that variety in a very clear pure pink, you will know something of the beauty of Joan Pety.

Bulbs No. 3 or larger \$5.00 each.

NANCY ANN (Decorative) (Com.)

(80 to 85 days)

Light lavender pink blending slightly deeper at edges of petals. Lower petals marked cream. Six perfectly placed blooms with round lightly frilled petals on an always straight 20 bloom spike. Has all the qualities to be an outstanding commercial variety.

Bulbs No. 3 or larger \$5.00 each.

No. 458—SO BIG (Exhibition)

(80 to 85 days)

Deep rose pink with violet feather on lower petal. Six to eight blooms open on tall straight spike. A seedling of Dr. Moody with same massive spike. We have always found the blooms well placed.

Only those who saw this at Detroit or at our place can realize the beauty of this variety. The name speaks for itself.

Bulbs No. 3 or larger \$10.00 each.

One large bulb each of Joan Pety, Nancy Ann and So Big for \$15.00.

PRODUCTION GUARANTEE

With each bulb purchased of Joan Pety, Nancy Ann or So Big, we guarantee a production of at least 20 bulblets at end of first season. If your bulb should fail to produce this amount we will make good the shortage.

KINYON INTRODUCTIONS FOR 1934

HONOR (Ex.) (Com.) (Dec.) 80 to 85 days. Clear lavender with dustings of self color on white in lower petal. About 6 blooms open at one time with good placement and straight spike. We have found the color always clear both in the field and as a cut flower.

Large bulbs each \$5.00. Medium, each \$2.50.

RUSTY (Ex.) (Com.) (Dec.) 75 to 80 days. Color is made up of very fine lines of Scarlet and yellow which gives the effect of orange. Lower petal marked yellow. Six or eight large wide open blooms of good placement on 18 or 20 bloom straight spike. A favorite with florists.

Large bulbs each \$2.00. Medium, each \$1.00.

We give the same production guarantee with Honor and Rusty that we are giving with our three 1935 introductions.

KINYON VARIETIES OF OTHER YEARS

With Date of Introduction and Blooming Dates

DR. MOODY (1927, 80 to 85 days). Our first variety to be introduced and so well known that it needs no description.

MARY LOCKWOOD (1928, 80 to 85 days). Shell pink with scarlet lines on lower petals. Tall spike with many large blooms open at one time. Spikes from large bulbs are apt to crook.

RESPLENDENT (1928, 85 to 90 days). Creamy pink blending to rose pink at edges of petals. Intensely ruffled. Many good sized perfectly placed blooms open at one time on tall straight spike. Novelty, said to be one of the most beautiful ruffled varieties.

BETTY LUCILLE (1929, 85 to 90 days). LaFrance pink blending to clear throat. Very large blooms with six or eight open on tall straight spike. Blooms from large bulbs sometimes come side ways.

FAITH (1929, 85 to 90 days.) Soft blue, similar in shade to Heavenly Blue and the color does not fade. Wide open blooms of good substance and perfect placement on always straight spike. Does best from young bulbs.

MARY VAN (1929, 75 to 80 days). Tall clear pink with tiny markings on lower petals. Many blooms of good size substance and placement on straight spike of about 20 buds and blooms. At A. G. S. show Toledo 1928 this was judged best seedling suitable for commercial use. Also good exhibition variety.

LORRAINE BUDGE (1930, 85 to 90 days). Very clear light pink blending to lighter throat. Tall spike with large blooms.

MARY MARIE (1930, 80 to 85 days). White with edges bordered as though embroidered with rose pink. Small dark red markings on lower petal. Tall straight spike with five to seven perfectly placed blooms open at one time. Size 3½ inches. Novelty.

BABY BETTY (1931, 80 to 85 days) (Small decorative). Cream blending to light pink at tips of petals. Graceful, slender spikes with from four to six, small rosebud type blooms open at one time. Just a darling baby glad which you will love.

STATELY LAVENDER (1931, 85 to 90 days). Pale pinkish lavender. Long spike with ten or more well placed blooms open at a time. Distinct from other lavenders.

JULIA SELTZ (1933, 85 to 90 days). Light pink with markings of violet. Twelve to Fourteen perfectly placed blooms open at one time on tall slender spike that is always straight.

MAJOR GLADWIN (1933, 80 to 85 days). Dark scarlet red with a velvety tint of orange over the entire bloom. Blend of deeper red on lower petals. Five or six wide open blooms on straight spike.

Priced in general list.

GLADWIN GLAD GARDENS, Gladwin, Michigan

PRICE LIST 1935

TERMS: 5 bulbs at the 10 rate. 25 at the 100 rate. At these prices we prepay delivery on all orders over \$1.00 to any part of the U. S.

Write for special price on larger amounts to be shipped F. O. B.

We can also quote prices on bulblets of everything listed with the exception of the new ones for 1934 and 1935.

Every precaution is taken to produce clean, true to name bulbs. All bulbs that prove not true to name will be gladly replaced. There will be no substitution of variety without permission.

EXTRAS:—10% on all orders from \$3.00 to \$10.00; 15% on orders from \$10.00 to \$20.00; 20% on orders from \$20.00 to \$40.00; 25% on orders over \$40.00. These extras are only given with retail orders. Please make your choice to assure you satisfaction.

Bulbs state inspected and also personally inspected before shipping.

We are members of the Michigan Bulb Growers Association.

GENERAL LIST

Large bulbs (L) are 1¼ inch or more in diameter. Medium bulbs (Med.) are from ¾ to 1¼ inch in diameter. Small bulbs (Sm.) are from ¼ to ¾ inch in diameter.
